

The world is facing an energy challenge. That's why Agentis is dedicated to helping businesses find energy sustainability and enact change.

Agentis partners with utility companies and their business customers to drive energy efficiency through the use of new information systems. Our innovative energy data analysis and delivery approach made us a 2011 Clean Energy Challenge finalist as well as an inaugural member of the Illinois Institute of Technology "Smart Grid Cluster."

We are looking for a PHP Engineer who wants to work hard, create solutions, and help us fundamentally change the way people think about and use energy.

OVERVIEW:

The PHP Engineer will play an important part in specifying our in-house technology requirements and helping to develop highly scalable software to benefit end energy consumers.

- Work well within a fast-paced environment that requires adaptability and high quality performance.
- Desire to build a long-lasting product with far-reaching societal benefits and define a new industry
- Provide input, creativity and excitement surrounding design and direction of existing and future applications

SKILLS & ABILITIES:

REQUIRED

- Experience with MVC-based frameworks and/or Zend Framework
- MySQL, Relational database design including queries and stored procedures
- Expert at object-oriented programming concepts and design patterns
- Portfolio and code samples showing work that demonstrates OO PHP programming
- HTML/XHTML
- Tableless layout design & Cross Browser/Platform Coding
- Experience with Javascript frameworks e.g jQuery, Dojo, MooTools
- Working knowledge of Subversion
- LAMP server administration
- Front-end AND back-end, well-balanced

HELPFUL

- Experience with service-oriented architectures, web services, and Cloud technologies
- Experience with schema-less data architecture, e.g. Cassandra, MongoDB, CouchDB
- Graphic design and user-interface skills

EDUCATION AND/OR EXPERIENCE:

Bachelor degree or higher in Computer Science or related field and 3+ years of experience OR 5+ years developing custom production-level PHP 5 / MySQL applications

REWARDS:

Agentis offers a competitive salary, medical, dental, life and long-term disability. Paid time off and holiday breaks. Birthday donuts, all-you-can-play ping-pong, healthy snacks and strong coffee all in a modern work environment in the heart of Chicago's downtown.

HOW TO APPLY:

Email your resume in RichText Format (rtf) to jobs@agentisenergy.com. Please include links to any relevant online presence (blogs, LinkedIn, StackOverflow, Github, HackerNews, Twitter, Google+, etc.). If you do not have online examples of code available, please attach example code when sending your resume. Be sure to include your favorite line from the movie The Big Lebowski.

US Citizenship or permanent resident status required. No external recruiters please.
