INSTITUTE FOR FOOD SAFETY AND HEALTH
LAUNCHES NEW WEBSITE

(BEDFORD PARK, IL) April 8, 2011 – The Institute for Food Safety and Health (IFSH), formerly the National Center for Food Safety and Technology (NCFST), Illinois Institute of Technology (IIT), announced today the launch of its new website, www.iit.edu/ifsh.

The virtual makeover of the website, which replaces www.iit.edu/ncfst, reflects the restructuring of NCFST as one of four principal food science research centers operating under the newly formed institute.

“The updated web presence offers IFSH stakeholders in industry, government and academia user-friendly access to a number of resources and information about our world-class food research institute,” said IFSH Vice President and Director Robert E. Brackett, PhD. “I encourage all stakeholders to bookmark the new URL and visit the site often to take advantage of upcoming additions to the site.”

The IFSH website offers a number of online resources, news and public information about the institute's latest activities, state-of-the-art research capabilities and facilities, and staff. Members-only information is accessible from a password-protected log-in window.

###

The Institute for Food Safety and Health (IFSH) is a one-of-a-kind applied food research institute that provides stakeholders in government, industry and academia the opportunity to develop and exchange knowledge and expertise to address key issues in food safety, food defense and nutrition. Powered by a singular combination of in-depth food science expertise and state-of-the-art research capabilities, IFSH’s collaborative research model helps stakeholders define and design innovative and practical approaches to solving real-world challenges in food industry operations. Located at the Illinois Institute of Technology's (IIT) Moffett Campus in Bedford Park, IL, IFSH is also home to the FDA CFSAN Division of Food Processing Science and Technology.
