English Language Services

ILLINOIS TECH
English Language Services

If you are an international student required to participate in Illinois Tech's English language assessments, it is important for you to complete them immediately upon your arrival to Mies Campus. Assessments begin the week before classes start, so please plan to arrive early. All test takers are required to read the assessment instructions and test guidelines before arriving to take the test.

The English Language Assessment tests your natural language abilities in listening, speaking, reading, and writing. Assessments are computer-based tests that could take anywhere from 20 minutes to 2 hours to complete, depending on the individual student and the number of tests required. The assessment determines if you place into the courses available through our English language programs. If you place into courses, we will be able to identify which courses and/or levels of courses will most benefit you.
