I. INTRODUCTION

The Clinical Counseling program at Illinois Institute of Technology (Illinois Tech) offers specialized tracks in Clinical Rehabilitation Counseling and Clinical Mental Health Counseling. The faculty at Illinois Institute of Technology believe that Clinical Mental Health and Clinical Rehabilitation Counseling are specialized areas within professional counseling practice. These two specializations offer a variety of exciting career options. Graduates of the Illinois Tech Clinical Counseling Program (CCP) are well positioned to obtain excellent jobs in professional counseling and human service settings. Frequently, these counselors work as part of a team alongside physicians, psychologists, psychiatrists, social workers, physical and occupational therapists, and educators, as well as various other professionals. These teams work together with the individual who has a mental illness, disability or chronic illness to assess the individual's assets, limitations and preferences in order to assist in the planning of services intended to maximize the client’s functioning, independence, and quality of life. A major goal for the Clinical Counselor is to assist a person with a disability, chronic illness, mental health concern or behavioral issue to move from a position of psychological and economic dependence to one of independence.

II. MISSION AND OBJECTIVES OF THE TRAINING PROGRAM

The mission of the CCP at Illinois Tech is to offer a student-focused and evidence-based counseling curriculum that prepares students to become professional counselors trained to assist a diverse group of people who experience a mental illness, disability and/or a chronic illness across the lifespan. The CCP prepares prospective clinical rehabilitation and clinical mental health counselors for employment in numerous settings including mental health agencies, private counseling practice, public/private rehabilitation agencies, hospitals, correctional institutions, public schools, rehabilitation centers, social service agencies, and other organizations serving individuals with disabilities and mental health issues. It also provides advanced training for individuals presently employed in agencies and facilities offering professional counseling services.

The mission of the program is accomplished by training future professional counselors in the skills, research, evidence-based practices, and knowledge most relevant to the practice of clinical rehabilitation and clinical mental health counseling. Before students can graduate, they must demonstrate learning and competence in the following foundational areas:

a. History, philosophy and trends of both rehabilitation and mental health counseling;

b. Professional, ethical and legal considerations that influence the practice of clinical counseling, with an emphasis on clinical rehabilitation counseling and mental health counseling;

c. Intake, assessment and evaluation skills;

d. Diagnosis of mental disorders;

e. Individual, group and family counseling interventions.
f. Clinical counseling theory and evidence-based interventions, with an emphasis on application in rehabilitation counseling and mental health counseling settings;

g. Role and function of clinical rehabilitation counseling and clinical mental health counseling within the context of a variety of clinical practice settings;

h. Employment trends, career counseling, and job demands in a dynamic 21st century workforce;

i. Medical and psychological implications of chronic illness and disability including substance abuse, dependence and the potential for coexistence with other disorders;

j. Case management skills including the utilization of community resources and multidisciplinary team approaches in multiple clinical settings;

k. Diversity and multicultural counseling competencies;

l. Professional organizations, preparation standards and credentials relevant to the practice of clinical rehabilitation counseling and clinical mental health counseling;

m. Crisis, disaster and trauma assessment, intervention and emergency preparedness;

n. Research methodology including program evaluation;

o. Critical evaluation of research and the ability to incorporate the evolving fund of knowledge in the professional literature into clinical counseling practice;

p. Theory and etiology of addictions and addictive behaviors;

q. Evidence-based counseling strategies and techniques for prevention and intervention of addictions.

The Clinical Counseling Program has specialization tracks in two areas: (1) Clinical Mental Health Counseling and (2) Clinical Rehabilitation Counseling. Specific learning objectives for each of these specializations are as follows:

(1) Clinical Mental Health Counseling
   a. intake interview, mental status evaluation, biopsychosocial history, mental health history, and psychological assessment for treatment planning and caseload management.

   b. techniques and interventions for prevention and treatment of a broad range of mental health issues.
c. strategies for interfacing with the legal system regarding court-referred clients.

d. strategies for interfacing with integrated behavioral health care professionals.

e. strategies to advocate for persons with mental health issues.

f. Ability to apply multicultural competencies to mental health counseling.

g. Ability to apply and adhere to ethical and legal standards in counseling practice.

h. Ability to utilize a variety of theoretical approaches (cognitive, behavioral, etc.) and treatment modalities in order to assist individuals with behavioral and mental health-related distress.

i. Ability to apply effective strategies to promote client understanding of and access to a variety of community-based resources.

(2) Clinical Rehabilitation Counseling.

a. diagnostic interviews, mental status examinations, symptom inventories, psychoeducational and personality assessments, biopsychosocial histories, assessments for treatment planning, and assessments for assistive technology needs.

b. career- and work-related assessments, including job analysis, work site modification, transferrable skills analysis, job readiness, and work hardening.

c. strategies to advocate for persons with disabilities.

d. strategies for interfacing with medical and allied health professionals, including interdisciplinary treatment teams.

e. strategies to consult with and educate employers, educators, and families regarding accessibility, Americans with Disabilities Act compliance, and accommodations.

f. Ability to apply multicultural competencies to rehabilitation counseling.

g. Ability to appropriately use assistive technology principles to enhance client quality of life.

h. Ability to apply and adhere to ethical and legal standards in rehabilitation counseling.

i. Ability to apply knowledge of disability policy, financing, and regulatory processes to improve service delivery opportunities in rehabilitation counseling.

j. Ability to apply effective strategies to promote client understanding of and access to a variety of community-based resources.
III. ACCREDITATION

The Clinical Counseling program has been in existence at Illinois Institute of Technology (Illinois Tech) since 1966. The program was among the first nationwide to be accredited by the Council on Rehabilitation Education (CORE) as a Rehabilitation Counseling program in 1975, and maintained it until CORE merged with CACREP on July 1, 2017.

The program was accredited in 2015 by the Council on Counseling and Related Education Programs (CACREP) for both Clinical Mental Health Counseling and Clinical Rehabilitation Counseling, and currently maintains this status under the Rehabilitation and Mental Health Counseling Program until 2023.

The program is in the process of transitioning to what is currently known as the Clinical Counseling program, which has two separate specializations in Clinical Rehabilitation Counseling and Clinical Mental Health Counseling. We are in the process of applying for CACREP re-accreditation at this time.

IV. PROGRAM OF STUDY

Illinois Tech offers a 60-hour program of study in clinical counseling. Students within this program get a core curriculum in the counseling field with specialized knowledge in rehabilitation and mental health counseling. At the end of their first year in the program students then choose a specialization in either Clinical Rehabilitation Counseling or Clinical Mental Health Counseling. The full-time program is designed for individuals who are looking to enter either the Clinical Rehabilitation Counseling or the Clinical Mental Health Counseling field. The Working Professionals Program (WPP), which is also a 60-credit hour program, is designed specifically for individuals currently working in a mental health or disability-related field and who intend to complete the program at a slower pace while maintaining their full-time employment.

Full-Time Program of Study

The Full-Time Program of study in the CCP provides the equivalent of two years (four semesters) of full-time study and is designed to provide students with the essential knowledge and skills necessary for clinical rehabilitation counseling and clinical mental health counseling practice. A core of required graduate courses is described below, followed by increasingly more advanced clinical fieldwork, which is based in the student’s chosen specialization track. The program of study also affords students ongoing opportunities for interactive and collaborative experiences with persons with mental health concerns, disabilities and/or chronic illnesses, that align with each student’s chosen area of specialization.

Typical Course Sequence for Full-Time Program of Study
All courses listed below are required except where previous coursework makes them superfluous:

<table>
<thead>
<tr>
<th>Fall 1</th>
<th>Course</th>
<th>Credits</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 410</td>
<td>3</td>
<td>Introduction to Rehabilitation and Mental Health Counseling</td>
<td></td>
</tr>
</tbody>
</table>
PSYC 412 3 Multicultural & Psychosocial Issues
PSYC 513 3 Assessment in Rehabilitation and Mental Health Counseling
PSYC 523 3 Introduction to Theories of Psychotherapy
PSYC 557 3 Pre-Practicum in Rehabilitation and Mental Health Counseling

**Spring 1**

PSYC 526 3 Psychopathology
PSYC 561 3 Applied Counseling Techniques: Group Counseling
PSYC 563 3 Human Growth & Career Development
PSYC 583 3 Rehabilitation Engineering Technology I
PSYC 590 3 Psychiatric Rehabilitation I

**Summer**

PSYC 411 3 Medical Aspects of Disability (ONLINE)

**Fall 2**

PSYC 549 3 Practicum in Rehabilitation and Mental Health Counseling
PSYC 547 3 Evidence-Based Practices
PSYC 562 3 Job Placement
PSYC 564 3 Rehabilitation and Mental Health Counseling Research Seminar
PSYC 588 3 Addictions and Psychopharmacology

**Spring 2**

PSYC 578 9 Clinical Rehabilitation Counseling Internship
-OR-
PSYC 579 9 Clinical Mental Health Counseling Internship
PSYC 576 3 Research in Rehabilitation and Mental Health Counseling

**Total Credits: 60**

**Psychiatric Rehabilitation** – The curriculum in the CCP has a strong emphasis in psychiatric rehabilitation. This emphasis is designed to prepare students to more effectively help people with mental illness to obtain and maintain employment. Topics studied include counseling methods, successful vocational techniques and job placement strategies, psychopharmacology, diagnosis, consumer empowerment, use of community resources, supported education models, working with groups, and more. The following courses are intended to serve as the psychiatric rehabilitation core:

PSYC 590 Psychiatric Rehabilitation
PSYC 526 Psychopathology
PSYC 547 Evidence-Based Practice in Rehabilitation and Mental Health Counseling

**Working Professionals Program (WPP)**

The WPP is specifically designed for people who are currently working in the counseling field and are pursuing a master’s degree for job maintenance or enhancement. The WPP is designed to allow students to complete the degree program within three years while maintaining employment by taking into consideration students’ work schedules. The WPP is different from typical distance learning programs because we believe certain skill sets, such as counseling techniques and research methods, can only be obtained by engaging in group activities and direct contact with faculty. Therefore, in addition to providing online options for some classes, the
WPP offers face-to-face evening classes (at times via distance through Google Meet or Blackboard Collaborate Ultra) and summer weekend classes, where students will benefit from direct interaction with faculty and other students with little to no impact on work schedules. If the work site and site supervisor meet the fieldwork and related supervision requirements, it is possible for students in the WPP to complete some or all of the required fieldwork experiences at the work site. Students in this program should refer to the *Illinois Tech Clinical Counseling Fieldwork Manual* and talk directly with the fieldwork coordinator to ascertain if their work site would be an appropriate placement. The WPP is a 60 credit-hour program.

**Tentative Course of Study for the Working Professionals Program**

**Total Credits = 60**

V. CLINICAL TRAINING

Clinical training is a major emphasis of the curriculum and fieldwork experiences (practicum and internship) are required for all students in the CCP. All students complete one semester of part-time supervised practicum (200 hours). Students also complete a full-time supervised internship during their final semester in the program (600 hours). Internships must align with the student’s declared area of specialization in either Clinical Rehabilitation Counseling or Clinical Mental Health Counseling. Specific guidelines regarding clinical instruction and requirements for the
supervised fieldwork experiences are found in the *Illinois Tech Clinical Counseling Fieldwork Manual*.

VI. COUNSELING RESEARCH PROJECT GUIDELINES

The rehabilitation and mental health counseling research project is an independent project conducted under the supervision of a faculty adviser. The research project can be initiated only after the completion of PSYC 564 Rehabilitation and Mental Health Counseling Research Seminar. Through this project, students will examine theoretical frameworks and empirical research related to a specific problem facing a disability or mental health population. The population chosen should align with the student’s declared area of specialization in either Clinical Rehabilitation Counseling or Clinical Mental Health Counseling. Students will develop and write a study proposal. The research proposal should follow the format of a formal thesis, which is presented in detail in PSYC 564. If the student cannot complete the project in one semester, he/she/they must register for at least one credit of research project each semester until completion of the project.

VII. ACADEMIC INTEGRITY

Students are expected to adhere to the *Code of Academic Honesty* outlined in the graduate handbook. Cheating or plagiarism in any form is unacceptable and constitutes inexcusable behavior. Simply stated, plagiarism is presenting someone else’s work as one’s own. Any incident of plagiarism or cheating in a course is considered a serious offense and action will be taken as specified by the *Code of Academic Honesty*. The full code can be accessed here: [https://web.iit.edu/student-affairs/handbook](https://web.iit.edu/student-affairs/handbook)

VIII. STUDENT EVALUATION

Being a successful clinical professional counselor requires not only knowledge, but certain interpersonal skills and personal characteristics. For example, counselors need to show an ability to listen, consider the point of views of others, tolerate ambiguity and strong emotion, react to disturbing disclosures without becoming judgmental, and other similar characteristics. Thus, several classes will include an evaluation of these areas as well as one's academic performance. It is understood that these skills, abilities and characteristics involve some degree of subjective judgment on the part of first the faculty, and later, the site supervisors at practicum and internship settings. Every attempt will be made to make the evaluation of these qualities as fair and objective as possible, but students need to be aware that sometimes grades in counseling skills courses will be, in part, based on these less tangible factors.

The faculty has an ethical responsibility to ensure that students have the knowledge, skills and personal maturity to work independently with individuals with mental health and other disabilities prior to graduation. The faculty conducts an annual evaluation of each student in April/May of each year while a student is in the program. In addition, a faculty member can request a special evaluation of a student at the end of his/her practicum or internship, based on poor performance. During the annual or special evaluation, faculty review the collective feedback (mid-term and final) from the site supervisor(s), the feedback of the faculty member(s) who have provided individual and group supervision and completed class assignments. Faculty
may require the student to repeat the practicum and/or internship until acceptable skills or traits are demonstrated. When the faculty is in doubt of the student’s ability, character, or integrity to become an effective counselor, they may terminate the student from further clinical training. Students who disagree with a decision regarding their evaluation have the right to follow the grievance procedures outlined in section XIV of the program manual.

The student’s progress is evaluated in two major areas: (a) academic performance and (b) clinical work. Faculty have a group discussion about the progress and achievement made by each student and any concerns related to the student are presented. The advisor collects the feedback from the meeting and completes the annual evaluation form. The summary of the annual evaluation meeting is shared with the student in face-to-face meeting and written format. The advisor and the student discuss recommendations about retention/remediation/dismissal from the faculty and/or strategies to improve student’s learning and progress if necessary. If the student receives “remediation” twice, the entire faculty and the student have a group meeting to develop the final remediation plan and both parties sign the remediation plan document. If the student does not adhere to the remediation plan and receives another remediation, the faculty will evaluate if dismissal from the program is warranted in accordance with the Department of Psychology’s Policy on the Evaluation and/or Dismissal of Students.

Grade Point Average: Satisfactory performance in the graduate divisions is defined by the university as the maintenance of a minimum cumulative GPA of 3.0/4.0, as reported by the registrar. The minimum GPA for graduation is 3.0/4.0. This figure is based only on those courses that appear on the approved program of study and not on the total cumulative GPA reported by the registrar; there is no exception or waiver to this rule. There are also several courses in the clinical fieldwork progression that require a minimum grade of “B” in order to progress (see Clinical Fieldwork Manual). If a student is required to repeat a course, the last grade issued for the course will be used to compute the cumulative GPA and the program of study GPA. Please note that repeating a course requires a student to fully register and pay for the course again.

Academic Probation: A graduate student whose cumulative GPA falls below 3.0/4.0 is no longer in good standing with the University and must petition the Graduate College, Office of Academic Affairs for permission for provisional enrollment by submitting form G702. Students for whom provisional enrollment is granted must not earn a semester GPA less than 3.0 while on Academic Probation. Probationary students who receive “C” or “E” grades will be required to repeat courses to improve the cumulative GPA. Dismissal will occur when a student fails to make the requisite academic progress during the probationary period. If a student’s GPA in his or her approved program of study is below 3.0, then graduate courses approved on a revised Program of Study Form G406 may be added to the program until the corresponding GPA is at least 3.0, with the approval of the Graduate College, Office of Academic Affairs.

Students should consult the Illinois Tech Graduate Handbook for additional policies regarding withdrawing from a course, leave of absence, and other special circumstances.

IX. POLICY ON COURSE WAIVER: ADVANCED STANDING

Students who wish to pursue an MS Clinical Counseling with Advanced Standing may request a maximum of 15 credit hours be waived for specified courses provided that:
1. the student received graduate credit for the course at Illinois Tech or another U.S.
   university;

2. the course is judged to be relevant to the current rehabilitation and mental health
   counseling education program;

3. a current faculty member in Counseling and Rehabilitation Science, who teaches the
   course, has recently taught a similar course, or would be qualified to teach a similar
   course, evaluates the course syllabus and textbook(s) and determines that the course
   sufficiently overlaps with the course taught at Illinois Tech and is of satisfactory quality
   to qualify as a transfer;

4. The courses taken at another U.S. university did not count toward completion of another
   degree. *(This policy is under review)*

In order for a course to qualify toward the Advanced Standing waiver, the student must receive a
B or better in the course, and must get written approval from the relevant faculty member and
also from the Head of the Counseling and Rehabilitation Science Division. *If a student was not
admitted with Advanced Standing and feels that he or she may qualify for this, they should speak
to the Program Director as soon as possible in order for the case to be reviewed and to get the
status changed.*

The following courses are eligible to be taken through Illinois Tech as an undergraduate student
seeking Advanced Standing, or to be waived, if taken elsewhere as a graduate student (no more
than 15 credit hours):
   • PSYC 410 Introduction to Rehabilitation and Mental Health Counseling
   • PSYC 411 Medical Aspects of Disability
   • PSYC 412 Multicultural and Psychosocial Issues in Rehabilitation and Mental
     Health Counseling
   • PSYC 513 Assessment in Rehabilitation and Mental Health Counseling
   • PSYC 523 Introduction to Theories of Psychotherapy
   • PSYC 562 Job Placement
   • PSYC 563 Human Growth and Career Development
   • PSYC 564 Rehabilitation and Mental Health Counseling Research Seminar
   • PSYC 583 Rehabilitation Engineering Technology I
   • PSYC 590 Psychiatric Rehabilitation

X. PROFESSIONAL CREDENTIALING

Students who graduate from the CCP are trained as clinical counselors and have an ethical
responsibility to carry the appropriate certification and clinical license relevant to their practice.
Students completing the program with Clinical Rehabilitation Counseling specialization are
eligible to sit for the Certified Rehabilitation Counselor (CRC) examination and become a CRC.
Students completing the Clinical Mental Health Counseling specialization are eligible to sit for
the National Certified Counselor (NCC) exam through the National Board for Certified
Counselors (NBCC). Once the student passes the CRC and/or NCC exam, he/she/they are
eligible to become a Licensed Professional Counselor (LPC) in the state of Illinois. After
working for a minimum of 2 years under the supervision of a qualified clinical supervisor, individuals are eligible to become a Licensed Clinical Professional Counselor (LCPC) in Illinois. Students who intend to move outside the state of Illinois are strongly encouraged to understand licensure laws in their intended state of residency. The most updated licensing information available, as it relates to the Clinical Counseling program at Illinois Tech, can be found in the Appendix of this manual. Students are also strongly encouraged to educate themselves on licensure laws as well as national trends in licensure and certification by going to [http://www.counseling.org/knowledge-center/licensure-requirements](http://www.counseling.org/knowledge-center/licensure-requirements).

Students are eligible to sit for the CRC exam prior to graduation if 75% of coursework is completed. Students are encouraged to regularly visit the Commission on Rehabilitation Counselor Certification (CRCC) for exam application deadlines and materials: [http://www.crccertification.com](http://www.crccertification.com). Similarly, students are encouraged to visit the National Board for Certified Counselors (NBCC) website and familiarize themselves with the requirements necessary to sit for the NCC exam by going to [www.nbcc.org](http://www.nbcc.org).

XI. STUDENT INPUT TO THE PROGRAM

There are both formal and informal processes for students to communicate with program faculty about curriculum needs and program objectives. The formal processes consist of regular milestones during the student’s program of study where feedback is intentionally solicited. Students provide feedback to the instructor for each course through a formal evaluation process. In addition, student feedback is solicited during their year-end faculty annual performance evaluation and a formal evaluation of each student prior to graduation from the program. There are 3 student representatives on the Program Advisory Board: one student from the M.S. program, one student from the Ph.D. program, and the President of the Illinois Tech-Student ARCA Chapter. The advisory board meetings are held twice a year and student feedback and participation is encouraged at each meeting. Finally, students are invited to attend regularly scheduled program meetings that involve faculty, teaching assistants, doctoral and master’s students.

In addition to formal procedures for feedback, a number of informal processes exist for communicating with the program faculty. Students are encouraged to provide informal feedback to their course instructors and to advisors. Students are also encouraged to provide feedback to student representatives to the Advisory Board for discussion at one of the advisory board meetings, when appropriate. Input can also be given at any time by verbal or written request to any faculty member to attend the program faculty meeting.

XII. ACCOMMODATIONS

The CCP faculty is committed to utilizing instructional strategies that support and facilitate a viable learning community with an emphasis on respect for different learning styles. The Center for Disability Resources ensures that all materials (program, instructional, occupational, testing, etc.) are made available in alternate format to meet the individualized needs of each student. Examples of modifications include: note taking, sign-language interpreting, speech-to-text services, testing accommodations, tutoring, and housing accommodations, to name a few. The CDR utilizes computer, audio-recording, video-recording, among other forms of technology to accommodate students’ needs.
If a student believes he/she/they require accommodations to the learning environment, please contact the Center for Disability Resources, 10 W. 35th Street, Suite 3F3-1, Chicago, IL 60616, phone (312) 567-5744 (voice), (312) 567-5135 (TDD), disabilities@iit.edu (email), and https://web.iit.edu/cdr (website). The process of approving accommodations can take time so students should please contact the office as soon as they are accepted into the program.

The CDR Director will notify the instructor of the courses the student is enrolled in at the beginning of each semester that an accommodation(s) is required and the nature and type of accommodation to be received. If your instructor feels it is necessary, a meeting may be requested with the CDR, the student and the instructor to clarify accommodations.

XIII. PROFESSIONAL IDENTITY

Professional Identity. The CCP faculty regard rehabilitation counseling and mental health counseling as specialty areas within the counseling profession. It is important that students develop a strong identity as a professional counselor. As a future professional counselor, it is important for students to affiliate with the larger community of professional counselors to stay current on clinical practice, ethical codes of conduct and scope of practice through continuing education opportunities and professional journals as well as affiliation with other professional counselors.

Ethical Adherence: Students entering into the CCP are required to adhere to both the American Counseling Association’s (ACA) Code of Ethics, found at http://www.counseling.org/Resources/aca-code-of-ethics.pdf, and the Commission on Rehabilitation Counselor Certification (CRCC), Rehabilitation Counselor’s Code of Professional Ethics, found at http://www.crccertification.com/filebin/pdf/CRCCodeOfEthics.pdf

Professional Associations. Professional organizations are an important component of any profession. They provide continuing education, define scope of practice, and establish the ethical code of conduct for the profession. Associations provide continuing education opportunities at annual conferences, in professional journals and newsletters, and online continuing education opportunities. It is important for graduate students to become involved in professional organizations to facilitate growth as professional counselors.

Professional Conferences. Students are encouraged to attend the American Counseling Association (ACA) annual conference every year. Students involved in Illinois Tech’s chapter of ARCA have been successful in obtaining funding support for this travel in past years. Graduate students in the Rehabilitation and Mental Health Counseling program are urged to attend this and other professional conferences and meetings provided by ACA, the American Mental Health Counseling Association (AMHCA) and the American Rehabilitation Counseling Association (ARCA) as well as their state chapters, if available. Information about such meetings and conferences can be found on the website of each association.

Because Illinois Tech’s philosophy is that both rehabilitation counselors and mental health counselors are professional counselors who specialize in working with people with disabilities or mental health concerns, students are encouraged to join, as student members, the American
Counseling Association (ACA) and the division for Rehabilitation Counselors, the American Rehabilitation Counseling Association (ARCA), and for Mental Health Counselors, the American Mental Health Counseling Association (AMHCA).

The URL for each association is below:

American Counseling Association (ACA)     www.counseling.org
American Rehabilitation Counseling Association (ARCA)  www.arcaweb.org
American Mental Health Counseling Association (AMHCA) www.amhca.org

By joining the above professional organizations, students will receive the following professional journals, which are strongly recommended for reading:

1. Journal of Counseling and Development (ACA)
2. Rehabilitation Counseling Bulletin (ARCA)
3. Journal of Mental Health Counseling (AMHCA)

Illinois Institute of Technology has a Student Chapter of the American Rehabilitation Counseling Association (ARCA) as part of the recognized list of student organizations on the campus. Students are encouraged to become student members of ARCA (cost is $25.00 annually) and membership comes with a subscription to the ARCA journal, the Rehabilitation Counseling Bulletin.

ARCA student members who are active in the Illinois Tech-ARCA Student Chapter may be eligible for funds through the Illinois Tech student government and ARCA to attend national ACA conferences and participate in student competitions designed to recognize original student work. Previous Illinois Tech students who have attended national conferences have met leaders in the counseling field such as Dr. Gerald Corey, Dr. Vilia Tarvydas, Dr. Fong Chan, Dr. Brian McMahon (Illinois Tech Alum), Dr. Susan Brueyer, among other professionals.

XIV. GRIEVANCE PROCEDURES

During the degree program, students may feel they need to file a complaint regarding a grade received on an assignment or for a course, a particular behavior of an instructor, or a decision by the faculty, for example, to repeat a course such as practicum or internship. Should a student wish to file a complaint he or she should first discuss the matter with the faculty member(s) who made the decision. If the complaint is not resolved/understood to the student’s satisfaction, the student should take the issue to the Program Director/Head of the Division of Counseling and Rehabilitation Science, Dr. Kelly Kazukauskas. She can be reached via email at kkazukau@iit.edu or phone at (312) 567-3506. If the decision was made by the Program Director or the student does not feel his or her grievance was resolved by the Division Head satisfactorily, an appeal can be made to Dr. Jon Larson, Chair of the Department of Psychology. He can be reached via email at larsonjon@iit.edu or phone at (312) 567-6752.

XV. APPLICATION FOR GRADUATION
Students who are planning to graduate in the upcoming term should follow procedures and guidelines outlined in the Graduate College Bulletin at http://web.Illinois Tech.edu/academic-affairs/graduate-bulletin.

APPENDIX

State Licensing Information Disclosure to Consumers
