

Illinois Tech Dual Enrollment Partnerships

Illinois Tech is excited to launch new Elevate College Prep Dual Enrollment Tracks for fall 2025. Fall Courses begin August 2025. High school students can choose to enroll in all courses offered in each track over the course of four semesters, or they can pick and choose to enroll in just a few!

We're seeking to partner with high schools around the state of Illinois and the United States to create a pathway for students to explore their interests while earning college credit! All courses are transferable to Illinois Tech and may be transferable to other post-secondary institutions.

To receive college credit, students must pass courses with a grade of "C" or better. Depending on the particular high school, the student will earn high school graduation credit, but not college credit, with a grade of "D".

Interested in partnering with us? Contact Scott Tillman (stillman@iit.edu) to schedule a call to learn more.

Dual Enrollment Tracks
