EARNING DIGITAL BADGES AND CERTIFICATES WITH THE BRONZEVILLE OPPORTUNITY ENGINE

Are you interested in gaining new STEM skills and earning the credentials that showcase the extent of your knowledge? The Bronzeville Opportunity Engine at Illinois Tech has **free courses** in technology, project management, and more that can lead to you earning digital badges and certificates that will help you level up your skills and train for the modern job market.

WHAT ARE DIGITAL BADGES?

Digital badges are a virtual representation of the achievements, skills, or competencies that an individual earns through educational programs, training, or other activities.

WHAT ARE CERTIFICATES?

A certificate is a credential that shows your achievements in one area. Our certificate enables you to start a career as a technology consultant. In this program, you'll learn in-demand skills to advise clients on the use of cloud technology to meet business objectives. No degree or experience required.

If you are a member of the Bronzeville neighborhood or a surrounding Chicago community who is looking to start or advance a career in high-growth tech industries, this programming is for you!

To learn more about programming and to see if this opportunity is right for you, contact Felena Bunn at fbunn@illinoistech.edu.
